Egan Dimension Presentation Boards

- Egan Versa Presentation Surface™
- Dry-Erase and Projection
- Guaranteed-to-clean
- Warp-free construction
- Easy installation options
- LEED Compliant

Egan Dimension Presentation Board

Frameless design and Egan Versa Presentation Surface™ combine to create a low gloss, dry-erase board and non-reflective projection screen in one product. The board sets a new standard for design features and practical performance. Built to LEED compliance, Egan Dimension Board is the green whiteboard. Available in White or Natural Edge clear coat option to reveal the board's sustainable fiberboard construction.

Available with custom color edge on volume orders.

Flush Mount with White Edge

Frameless Design

The sustainable one inch thick fiberboard and recycled honeycomb core stabilize the Egan Dimension Presentation Board to provide warp-free construction.

Available sizes: 24" x 36" through 48" x 96" and in sizes optimised for 4:3 and 16:10 projection aspect ratios. See Egan Dimension Buyer's Guide for details.

Dry-Erase and Projection

As with all EVS products, the Dimension Presentation Board is guaranteed-to-clean, and is a superb, low gloss projection screen.

Ready for capturing brainstorming notes or data projected presentations, no pull down screen or setup is required. The custom shape above reinforces the dual nature of the board with dry-erase notes on the left, data projection on the right.

Egan Versa Presentation Surface™ (EVS) is Standard

The Egan Dimension Presentation Board comes with Egan's standard EVS surface.

Egan invites shape customization on volume orders. Specify your simple shape and our engineers will respond with your concept ready for manufacturing approval.

Linked Dimension Presentation Boards

The Egan Dimension Presentation Board may be specified in linked configurations with square or round corner details. Create a massive presentation surface with clean joints and perfect alignment that is easy and economical to install.

Camlock and bisquit dowels ensure perfect results in moments. Specify panels up to 48" x 96" vertical or horizontal. White Edge finish only. See Egan Dimension Buyer's Guide for details.

Dimension Slim Design Presentation Boards

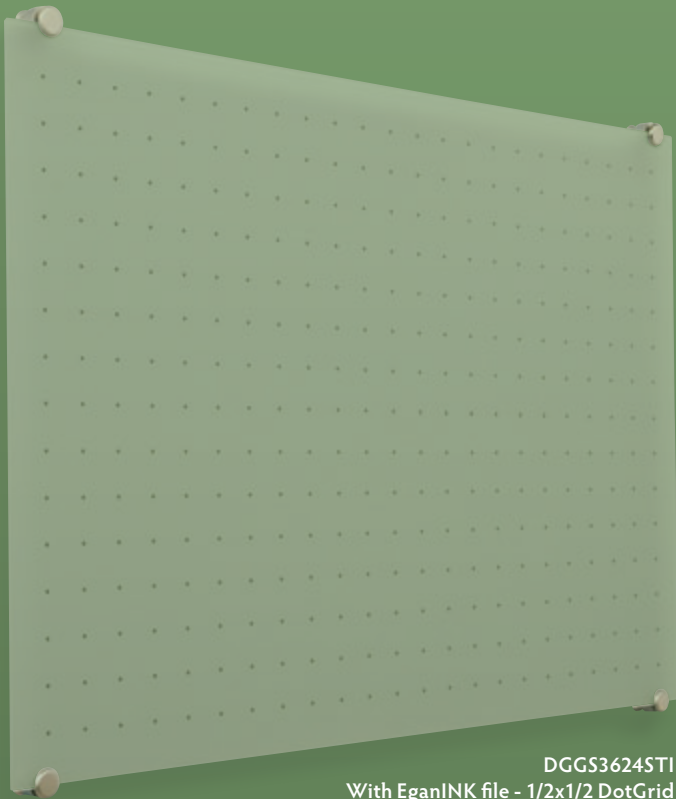

Lightweight and only 1/4" thick, the Dimension Slim Design makes a great impression. EganINK letters, lines and graphics offer limitless design options.

Mounted on raised stanchions, Dimension Slim stands about an inch off the wall. Ideal for dry-erase and projection.

Available sizes: 18" x 24" through 60" x 48"
See Egan Dimension Buyer's Guide for Details.

Egan GlassWrite

Let your interior design shine through Egan GlassWrite markerboards. 1/4" thick tempered® glass, frosted on one side and available custom EganINK letters, lines and graphics offer a safe and practical product with high design flair.

The high gloss nature of glass is not suitable for projection.

Available sizes: 18" x 24", 24" x 36", 30" x 36"
See Egan Dimension Buyer's Guide for Details.

Dimension Stanchion Mount

Stanchion Mounts clamp the Dimension Slim Design and GlassWrite markerboards about one inch from the wall.

EganINK

Durable letters, lines and graphics—EganINK gives you the flexibility to make whiteboard concepts that really communicate your message, sponsor your brand or coach your team. Visit www.eganink.com for more information.

Dimension Mounting Options

The innovative Dimension line offers three easy to install mounting options. The Flush and Floating Mount hangers (Patents Pending) install with a single screw and may be dialed to correct level if needed.

The elegant Stanchion Mount illustrated on the previous page adds special appeal and also installs with a single screw. A variety of eraser and pen tray additions are available to meet both practical and aesthetic specifications. See Egan Dimension Buyer's Guide for complete installation features and details.

Flush Mount

Dimension Flush Mount hangers attach to the wall quickly and easily. Twist clockwise to correct level. Simply engage with the Dimension Presentation Board mounting cleat to complete the flat to wall installation.

Floating Mount

Dimension Floating Mount hangers lift the Dimension Presentation Board off the wall by 1/2 inch to create a floating, lighter than air appearance.

3" custom radius Dimension samples illustrate flush and floating effects.

Dimension Cleat Mount

Dimension Cleats are inset into the board and feature a saw tooth edge for a firm lock-in fit with either Flush or Floating Mount fittings. See Egan Dimension Buyer's Guide for complete installation features and details.

Award Winning Egan Versa Presentation Surface™ (EVS)

EVS is a unique solution for combined dry-erase and projection situations. The guaranteed-to-clean dry-erase surface is second to none in performance and visual appeal. The matte-white, low gloss surface is also ideal as it minimizes glare and functions as a superb projection surface.

- Dry-Erase whiteboard surface
- Guaranteed-to-Clean
- Excellent Projection Surface
- Application proven
- No surface texture to distort image quality
- Interactive Stylus friendly surface

Dust Free Whiteboarding

Egan Versa Presentation Surface™ is exclusive to Egan and offers a smooth, matte white dry erase surface that is data projector friendly and guaranteed to clean for 10 years. Combine EVS with EganCloth or the handy VersaEraser for dust-free whiteboarding.

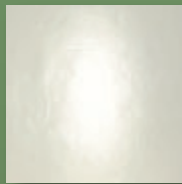

A variety of eraser and pen trays are available to meet both practical and aesthetic specifications.

All Whiteboards are not equal!

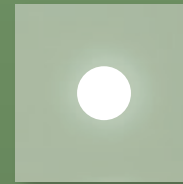

Egan Versa Presentation Surface

Brand Name Dry-Erase Wallcovering

Brand Name White Porcelain (Not recommended for projection)

Glass Markerboard (Not recommended for projection)

The images above accurately illustrate the difference in surface glare on leading whiteboard formats

Glare can cause eye strain and portions of the surface to become "invisible" in different viewing areas of the room. To overcome glare, whiteboard readers will often squint or move about to minimize the effect. Glass markerboards with their mirror-like glare and Porcelain are not suitable for projection applications.
