

Egan Bold

EganSystem Storage Solutions

EganSystem: Bold Track Based Storage System

- Custom Response Success Case
- Lightweight Air-Gap Construction Technology
- Extremely Strong, High Capacity Storage
- Features Egan Versa^{Jot}
- California State Approved

Track Storage Shelving

Conserve Floor Space

EganBold's lightweight air-gap construction technology provides exceptional strength with high capacity storage.

Install 81" from the floor on EganSystem Track to conserve floor space. The track distributes weight efficiently, allowing you to store up to 60 lbs. per shelf.

With EganSystem GripTrack and Security Locks your shelves can be locked to the wall to prevent movement, even under seismic activity.

This unique combination makes EganSystem approved for California State Office of Statewide Health Planning and Development (O.S.H.P.D.).

18" w x 42" h: Putty Etex shelves in vertical format.

42" w
cabin

42" w x 18" h: Custom color Etex shelves without doors.

42" w x 18" h: Charcoal Etex shelves with sliding doors.

EganSystem Bold: Credenza

EganSystem Bold storage shelves double their utility as credenzas when installed on a lower track 30" from the floor,

EganSystem Bold credenzas feature your choice of push-release doors, gliding doors that slide along a guide, or no doors at all!

36" w x 18" h: Charcoal Etex
hutch with push-release doors.

Dry-erase your way

Custom Response Inspired

EganSystem Bold expands on a successful collaboration with Egan Custom Response engineers.

Egan's Custom Response Program is built on the foundation of enabling our clients and designers to create specialized products. Our manufacturing systems are versatile and well appointed for custom work on volume orders.

36" w x 18" h: Putty Etex
hutch with flip-up door.

36" w x 18" h + 36" w x 18" h: Custom color
Etex credenza with push-release doors.

Responsible Manufacturing

Egan standard Etex colors are now offered in a high quality, colorfast and environmentally friendly water-based lacquer.

This new generation of Etex coating has better resistance properties and faster dry times than traditional lacquers.

It also meets the most stringent air quality standards, with Volatile Organic Compound (V.O.C.) emissions below testing detection limits.

Bold Accessories

Security Lock

- Approved for California State Office of Statewide Health Planning and Development (O.S.H.P.D.)
- Secures product to track, even under seismic activity
- Prevents unwanted movement

McMaster University:

Laboratory seismic test.

Whiteboards

Whiteboards come with EVS Write surface, perfect for capturing your dry-erase notes.

Thousands of fabric options available.

Tackboards

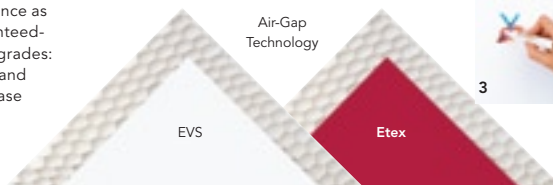

Tackboards are covered in EganFabric, a neutral color fabric that complements the full range of standard and Custom Color finish choices.

Egan has a synergy program with Maharam Fabrics to offer thousands of optional tackable fabrics. See price list for details.

The unique tool for generating, capturing and presenting ideas.

EVS features an optical hard-coat fused to an exceptionally opaque white surface. This coating permits improved legibility and performance as a projection screen and is guaranteed-to-clean. EVS is available in two grades: EWW for dry-erase applications and EWP for a combination of dry-erase and projection applications.

Take the EVS Test-Drive

1. Write on the EVS surface with a dry-erase marker.
2. Wait a minute, then erase. Use the amazing EganCloth for the best results—It eliminates ghosting and dry-erase dust.
3. If you used a permanent marker by mistake, grab a dry-erase marker and use it to scribble directly over the permanent marking, then just wipe it clean.
4. EVS Projection also features a low-gloss surface that is ideal for projection.
