

SimpleBoard

Featuring EVS™

Egan SimpleBoard

Simply the world's best dry-erase writing and projection board.

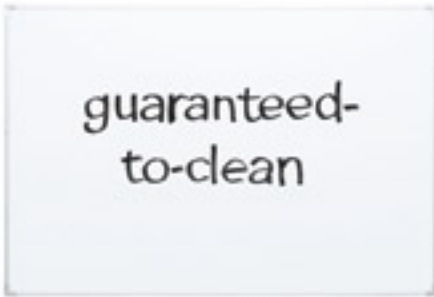

Works well with any data projector, even overhead and slide projectors.

Simple Projection Surface

Projected images look absolutely fabulous on the Egan SimpleBoard. The secret is in the surface. Egan engineers have developed a unique and remarkable material, Egan Visual Surface™ (EVS). EVS is an excellent dry-erase writing surface, and is also ideal as a projection surface. EVS offers an incredibly low gloss factor with a beautiful matte-finish.

You have to see it to believe it.

SimpleBoard cleans beautifully... every time

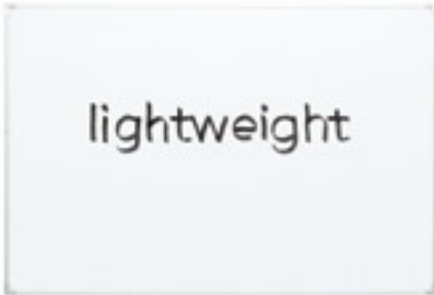

Write on the Egan SimpleBoard surface with your favorite quality dry-erase marker.

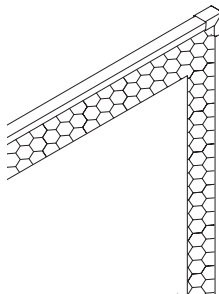

Wait a minute, then erase. Use the amazing EganCloth™ for the best results... it eliminates ghosting and dry-erase dust.

If you used a permanent marker by mistake, don't panic. Grab a dry-erase marker and use it to scribble directly over the permanent marking, then just wipe it clean.

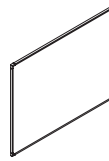

What makes Egan SimpleBoard so light?

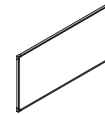

Our revolutionary new EVS dry-erase surface is fused to an aerospace-style honeycomb core creating an incredibly lightweight product. In fact, a 36" x 24" board weighs only 3 lbs.

That's right, only THREE pounds!

Ideal sizes for projection:

- SVB3624** 36" x 24"
- SVB4836** 48" x 36"
- SVB6048** 60" x 48"
- SVB7254** 72" x 54"

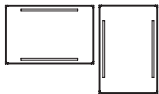

Ideal for workstation applications:

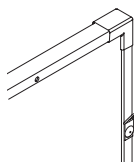

- SVB3618** 36" x 18"
- SVB4818** 48" x 18"

SimpleBoard is designed to hang practically anywhere... any way!

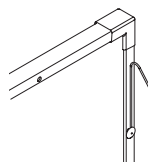

There are four SimpleBoard mount methods designed to accommodate most situations in either landscape or portrait orientation: Wall Mount, Panel System Mount, Cleat Mount, and Magnetic Mount.

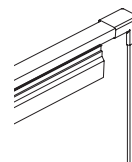

Landscape or Portrait: Adjust the SimpleBoard to hang your way... Simply change the mount brackets to switch the orientation.

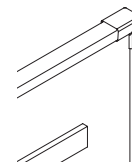

Wall Mount: Attach the bracket, then hang on the wall using an appropriate fastener.

Panel System Mount: Attach the system panel loop hook to the board, then hang on the panel system.

Cleat Mount: Remove adhesive strip from board cleat and attach to back of board. Attach wall cleat with appropriate fasteners. Hang board on wall.

Magnetic Mount: Remove the adhesive strip on magnetic mount and attach it to the board, then hang on a metal panel or surface.
