

The Perfect Choice:

An Egan Versa^{Pro} Case Study

"...I knew it was the perfect choice. We needed a cost effective, fast and simple installation of a superior dry-erase product."

- John Burns, Facilities Planner,
The MathWorks, Inc.

The MathWorks, Inc. is the leading developer and supplier of software for Technical Computing and Model-Based Design in the highly competitive areas of engineering and scientific work. Employing more than 1,800 people, The MathWorks is headquartered in Natick, Massachusetts, with offices and representatives throughout the world.

Shown here: One of 160 private office installations of pressure-sensitive Egan Versa^{Pro}. Framed with EganSystem Track, this office is able to add an optional Versa^{Board} to hand-off at the next collaboration.

Cost Effective Versatility

Chris Blackburn with Creative Office Pavillion (C.O.P.) worked closely with Don Savoy of McKearney Associates—the Boston area reps for Egan Visual—on a markerboard solution for The Mathworks head office campus expansion.

“When Chris introduced us to Egan Versa^{Pro} I knew it was the perfect choice. We needed a cost effective, fast and simple installation of a superior dry-erase product,” explains Mathworks

assistant facility manager John Burns. “We had a tight ten day installation window and the crew had all 160 Versa^{Pro} installed into our new private offices on time, on budget.”

The Versa^{Pro} installations ranged from 48”w squares to 48”h x 72”w and were framed with EganSystem track to support additional accessories and track mounted marker/tackboards.

XML Developer Jessica Aldrich understands the indispensability of whiteboard brainstorming.

Egan Versa^{Pro} is able to get to work anywhere, even in offices with modest available space.

The MathWorks’ corporate culture thrives on whiteboards and was ready to adopt an exciting new product from Egan Visual, the leader in visual communications systems.

At The MathWorks the job would be directed by the firm’s worldwide Facility Management Team. Bob Donahue and John Burns accurately translated the signature appearance of their existing offices to the new building design and layout.

With the project completed Mr. Savoy remarked: “Everyone is very pleased with the product and the professionalism that Egan Visual brought to this high profile project.”

Versa^{Pro} is now a daily part of their exciting MATLAB and Simulink product development process as their campus continues to grow.

Egan Visual is pleased to provide you with this corporate case study, and acknowledges all companies involved for their assistance and co-operation. Customer markerboards are clean or cleared before photography. This not only protects our customer’s proprietary information, but also demonstrates the guaranteed-to-clean properties of the EVS surface!
