Guaranteed-To-Clean

Egan Markers

All dry-erase markers can be used on EVS and EganBoard Porcelain surfaces. For best performance, Egan recommends using only Egan Markers or any solvent-based dry-erase markers. Low odor, inferior, or water-based markers are not recommended—They take longer to dry, leaving a film on the surface that is difficult to clean. Egan suggests Expo® scented markers as an alternative to low odor markers.

- Only use Egan Markers, or high quality solvent-based dry-erase markers on your markerboard. Inferior quality or low-odor markers can be difficult to remove, and might result in ghosting.

How to use an Egan Marker

- Remove the cap to draw/write.
- Firmly replace the cap to extend marker life.
- Store markers horizontally.
- Take advantage of all 4 colors.
- Be creative with color and line widths.
- Use an EganCloth for dust-free whiteboarding, and to ensure a clean surface every time.

Dust free whiteboardin

EganCloth

Regular cleaning will prevent dirt and contaminants from creating a filmy build up which can impede the performance of the markerboard surface. Wipe your EVS surface with an EganCloth and a household glass cleaner. Rinse with clear water. More thorough cleaning may be required if writing is left on the board for more than two days.

- Only use EganCloth to wipe your markerboard. Alternatives can cause dust build-up and ghosting.
- Rinse your EganCloth in clear warm water at least once a week to keep it clean. Use the EganCloth only when dry.

How to Use an EganCloth

- The EganCloth works best dry.
- Hold it any way that feels comfortable to wipe the board.
- When areas of the cloth become dirty, simply refold to expose clean, unused fabric.
- Dry-erase dust may appear on the cloth, but it will not transfer to your hands, clothing, walls or carpet, even after 100 uses.
- Occasional use of a household glass cleaner is recommended.
- Remove all dry-erase markings from the board with an EganCloth before applying a household glass cleaner.

EganCloth Washing Tips

- Hand or machine wash the EganCloth in warm, soapy water.
- Do not use fabric softener.
- Laundered hundreds of times, EganCloth still retains original cleaning properties.
- Wash separately—microfiber will catch lint in the wash water, which could reduce the effectiveness of the cloth.
- Dry on regular tumble cycle.

Cleaners

Wipe your EVS surface with an EganCloth and a household glass cleaner. Rinse with clear water. More thorough cleaning may be required if writing is left on the board for more than two days.

- Clean your markerboard using a household glass cleaner such as Windex® at least once a week to keep it looking like new.
- Stubborn marks might require cleaning with isopropyl alcohol, followed with your household glass cleaner.

Even permanent marker erases!

Use the EganCloth to remove dry-erase markings.

The EganCloth traps dry-erase dust, keeping it on the cloth and off hands, clothing, walls and carpets.

Used a permanent marker by mistake? Take an Egan Marker, scribble over the permanent marking, wait a minute, then use an EganCloth to clean.

EGAN

Egan Markerboards are not just whiteboards...

Guaranteed-To-Clean

Original EganBoard Porcelain whiteboards feature a durable, off-white surface manufactured with a thick coating of porcelain, permanently fused to sheet metal.

EVS and Versa Presentation Surfaces are exclusive to Egan, EVS Technology offers a smooth, matte white dry-erase surface that is data projector friendly.

Dust-free Whiteboarding

Egan Markers and EganCloth Erasers Combine high quality Egan Markers with Microfiber EganCloth and say goodbye to dry-erase dust.

Versatile Formats

Framed markerboards, presentation cabinets and self-adhesive **VersaJot** and **VersaPro** professional quality products are offered in well designed formats for every communication requirement.

Award winning EVS has inspired the creation of various Egan whiteboard and projection screen products in a variety of product and accessory offerings .

EVS is guaranteed-to-clean.

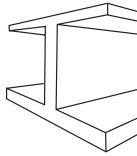

EVS provides a full 160° comfortable viewing angle, without dimming the lights.

EVS is available in several forms to suit specific applications: Lightweight honeycomb lamination, laminated on steel to accept magnet accessories, self adhesive formats VersaJot in custom shapes and 54" high VersaPro to install any length—smoothly from a roll onto a wall.

What is a 'Honeycomb' Core?

Lightweight Egan markerboards feature recyclable paper products formed into a 'honeycomb' shape to create an incredibly lightweight core. EganBoard Porcelain or EVS is fused to the core to create a whiteboard surface. The honeycomb shape provides strength, and insures a durable, lightweight, warp-free whiteboard.

EGAN INK

EganInk is another Egan Visual whiteboard innovation developed to create stunning grids, templates and lettering to your specification in a variety of colors. Exclusive to Egan EVS products—EganInk gives you the flexibility to make whiteboard concepts that really communicate your message or design.
